

THE DOME TECHNOLOGY DIFFERENCE

Our team has built more than 700 industrial and commercial domes worldwide, and our bread and butter is constructing domes that store bulk products like cement powder, wood pellets, grain, and coal. Our buildings also keep communities safe during natural disasters and act as assets for communities.

We are a creative group, actively expanding our expertise to include liquid storage tanks, concrete repair, silo rehabilitation, and general contracting in the last decade. What we build helps business run smoothly all over the world.

We got our start by inventing a specialized dome-construction process, but after 40 years in the industry, versatility is now our strongest suit. We are the world's leading expert in dome construction because we invented the process. We typically employ a design-build method for the entire project, but for those seeking support in specific portions of projects, we do that too, and we often do it in innovative ways.

Dome Technology is driven by the pursuit of innovation and advancement. Join our team today.

FLEX YOUR CREATIVITY. SEE THE WORLD. MAKE A DIFFERENCE.

Picture this: You're a grain company in Canada, and business is booming. You anticipate that in two years, you'll need to store one million bushels in a single structure. Is it possible?

Dome Technology is the answer. Our team works with two kinds of clients: those needing bulk storage, and those needing commercial space. Our storage domes hold more product in less space than any traditional silo or warehouse, and our commercial buildings require no interior trusses, making them ideal for gymnasiums, auditoriums, and storm shelters.

We aren't the company for everyone. Our employees embrace challenge. They tackle problems. They know the best way today might not be best forever. They want to see the world and make it better too.

Dome Technology works hard to discover creative solutions, and we rely on exceptional workers to build the products our customers need. Members of our team leave this position with lifelong skills and valuable career experience—or they stay for decades because every project is new and exciting.

Here are our top benefits:

- *Competitive salary*
- *A full range of benefits*
- *Paid time off*
- *Assignments worldwide*
- *Innovation welcome!*
