

An international construction company providing your turnkey solution
for bulk storage and handling, commercial construction, and concrete repair and
rehabilitation

WWW.DOMETECHNOLOGY.COM

A ONE-STOP SHOP FOR YOUR NEXT PROJECT

We got our start by inventing a specialized dome-construction process, but after 40 years in the industry, versatility is now our strongest suit.

Our team has built more than 700 industrial and commercial structures worldwide, and we continue to expand our expertise to include liquid storage tanks, concrete repair, silo rehabilitation, general contracting, and more. Dome Technology is driven by the pursuit of innovation and advancement.

We typically employ a design-build method for the entire project, but for those seeking support in specific portions of projects, we do that too, and we often do it in innovative ways.

Over decades we have built strong relationships with industry partners who have proven track records in their own areas of expertise. We are also knowledgeable in stored-product considerations, optimal design for product integrity, and subcontractor warranty management.

SAFETY COMES FIRST

From the CEO to the project managers, superintendents, and our skilled laborers, safety comes first. With current OSHA/MSHA training, we provide a comprehensive company safety program and nurture a strong culture of working safe every day.

A TURNKEY INDUSTRIAL &
COMMERCIAL SKILL SET

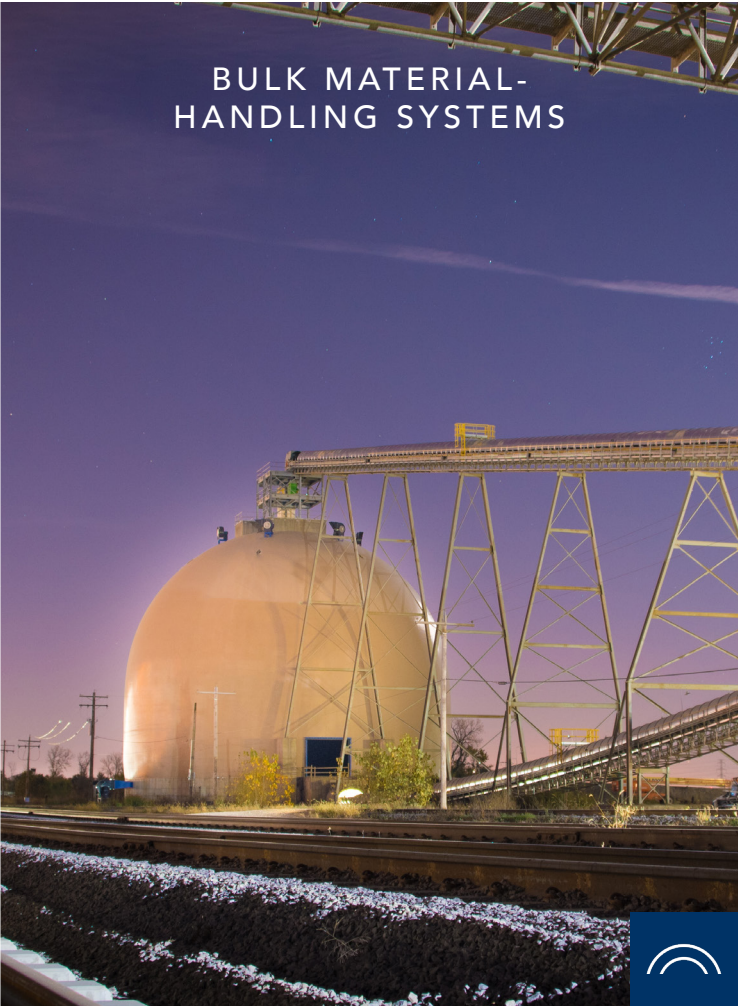

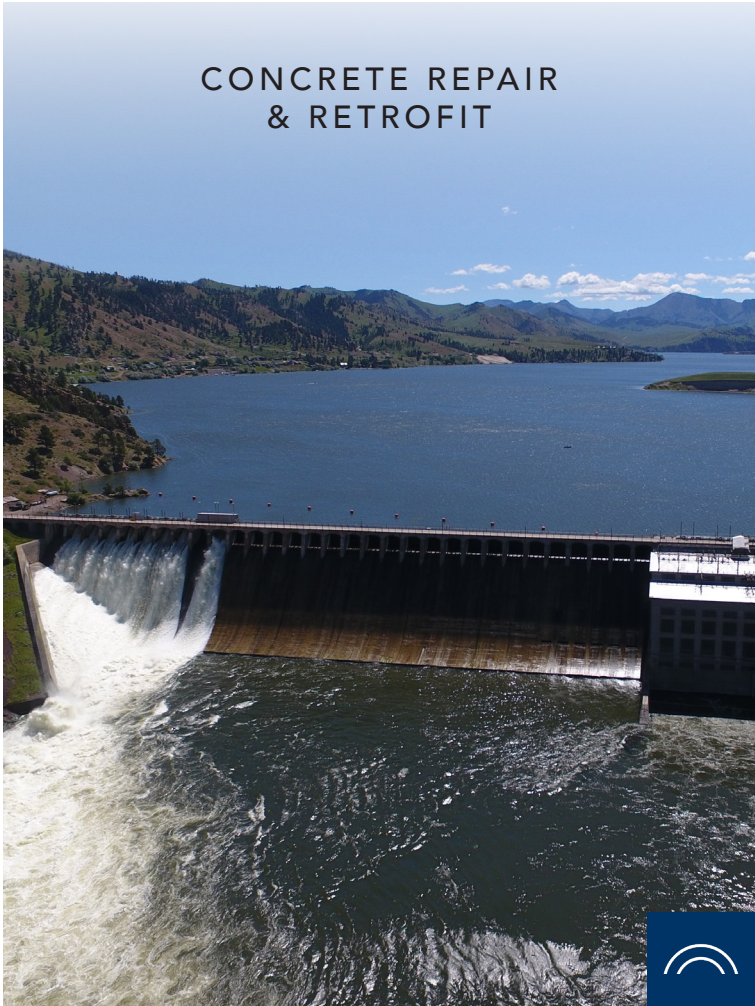

More storage. Smaller footprint. Strength to weather any storm. And robust conveyance to match. Introducing the monolithic concrete dome from Dome Technology.

Many industrial customers select our team to provide the entire package. We are the world’s leading expert in dome construction because we invented the process and can provide the design and installation of the mechanical systems required for bulk storage, from equipment on the inbound side to reclaim systems and throughput speed. When every element is planned with the others in mind, the result is a seamless, highly efficient system.

Commercial design and construction is another important part of our portfolio, and we build ICC 500-rated storm shelters, event centers, fire stations, and multipurpose buildings that boast free-spanning interiors with no interior supports. Discover the advantages of thinking outside the box with our team.

EXCELLENCE IS PARAMOUNT

Delivering a first-class project is at the core of who we are. We use a systematic mobile-reporting process from the field to the office that provides real-time updates and corporate oversight, ensuring a superb project every time.

PORTFOLIO & SKILL SET AT A GLANCE

BULK-STORAGE APPLICATIONS

Alumina	Corn	Soda ash
Ammonium nitrate	Fly ash	Soybean meal
Ammonium sulfate	Frac sand	Soybeans
Barley	Gold ore	Sugar
Bauxite	Grain	Sulfur
Bentonite	Gypsum	Synthetic gypsum
Canola	Iron	Titanium
Cement	Iron pellets	Torrefied pellets
Clinker	Limestone	Urea
Coal	Liquid	Wheat
Coke	Molybdenum	Wood chips
Copper	Phosphate	Wood pellets
	Potash	Zinc
	Salt	... and more

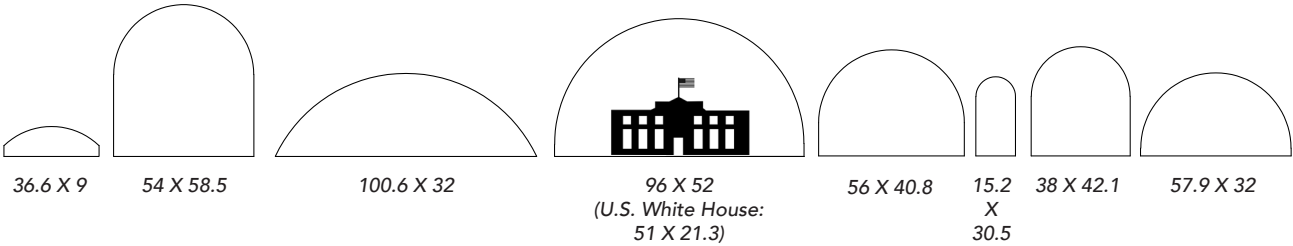

PROFESSIONAL MEMBERSHIPS & COMMITTEES

American Concrete Institute
Grain Elevator & Processing Society
IEEE (Institute of Electrical & Electronics Engineers)
National Grain and Feed Association
National Safety Council
National Storm Shelter Association (board member)
U.S. Industrial Pellet Association

DEMANDING PROJECTS

- ▶ Storage project in Colorado, USA, at 11,000 feet elevation
- ▶ Industrial storage project above the Arctic Circle in Murmansk, Russia
- ▶ Seismic-resistant 50,000 metric ton dome in Santiago, Chile

ACTUAL PROJECTS TO SCALE
diameter x height in meters

PRODUCTS & SERVICES

General contracting	Shotcrete application	Engineering	Specialized surfaces
Turnkey design-build industrial & commercial construction	Concrete repair & coatings	Automation & controls	Airforms for air-supported structures
Shallow/deep foundations	Silo repair	Mechanical reclaim	Airform repair
Concrete flat work	Walls	Material handling	Roof & tank coatings
Steel buildings	Retaining structures	Cost estimates	Polyurethane application
Millwright	Slope stabilization	FEED studies	
Structural steel fabrication & detailing	Dam repair	Storage	
Construction management	Tunnel construction	Reclaim	
	Vault construction	Foundations
